

Business Opportunities to Support Bellevue Students during COVID-19

With its strong economic base, and nationally-ranked schools, Bellevue is one of the most desirable communities in the US in which to live and work. From the goods and services you provide, to the employees whose lives you support, to the organizations who receive your charitable giving, our communities are dependent on your success. The families that frequent your business now need your support more than ever and it's your opportunity to help support them.

We have transitioned to an online event and we want to assure you that you will receive as much or greater exposure to our donors during this campaign as you would have at the event. We are 100% committed to working with you to ensure you receive the value your sponsorship deserves.

As an organization, the Bellevue Schools Foundation has shifted its focus to emergency services for its most vulnerable students—emergency food for students who typically rely on school breakfasts and lunches, and on-line mental health services for middle and high school students experiencing anxiety and depression. We have also funded on-line educational platforms that are currently allowing our children to complete their school work from home.

We are in uncharted waters. The District and local agencies are strained to cover the large numbers of students now needing to have their basic physical, emotional, and educational needs met. Your unrestricted donation allows for flexibility in this unprecedented time.

Your sponsorship will make a difference for every student at every Bellevue public school during the COVID-19 crisis.

We hope we can count on your support this year.

For as long as the COVID-19 crisis goes on, we will continue to work with the Bellevue School District to help ALL our students, including our most vulnerable children, get through it.

Let's work together to assure the continued vitality of our community.
